

An aerial photograph of a mountainous region. A prominent red line is drawn across the terrain, following a ridge and then a valley, which likely represents a watershed boundary. The mountains are covered in green vegetation, and some snow is visible in the higher elevations and valleys.

A photograph of a mountain slope with a red line indicating a geological feature. The slope is covered in green vegetation and rocky outcrops. A red line is drawn across the slope, highlighting a specific geological feature.

A photograph of a steep, rocky mountain slope. A yellow outline is drawn on the image, highlighting a specific area of interest on the mountain face. The slope is covered in dark, jagged rock formations and some sparse vegetation. The background shows a clear blue sky and a green valley floor.
